The advantages at a glance

- ◇ 6 different decors
- ◇ Slabs format 2.55 m x 1.20 m
- ◇ Easy installation with only one person
- ◇ Low installation weight
- ◇ 70% lighter than ceramic tiles
- ◇ Quick and dust-free installation
- ◇ No drying times
- ◇ Very high resistance
- ◇ 100 % waterproof

Easy installation with only one person

BEFORE

Designed for easy and quick installation

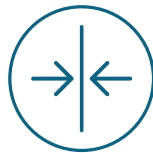

70% lighter than Ceramic tiles

Easy to process, no dust, no sound

Quick Installation

Attachment directly on existing tiles

AFTER

The future of renovation

Ceramin® is far more than „just“ a resource-saving alternative to classic materials. Due to the material properties, the tiles are above all practical and easy to process. Despite their size of 2.55 meters x 1.20 meters, the slabs decors only weigh 15 kg and are therefore significantly lighter than ceramic tiles.

They can be installed without dust or noise, flexibly adapted with a cutter knife cutter and have very short drying times. Above all, they can also be applied to old, existing tile mirrors. The effort required for the renovation of complete bathrooms or individual wet areas is therefore minimal.
