COLLECTION OVERVIEW

UBERWOOD, CREATED TO EXCEL TO THE NEXT LEVEL.

UBERWOOD flooring is unbeatable when it comes to durability! The all new, stylish and environmentally friendly flooring category combines the best features of traditional flooring with the most innovative technological developments.

By achieving usage class 33 and abrasion class 5, the flooring is suitable for all areas of application. The patented megaloc-aqua-protect-installation system guarantees that the floor is water resistant for up to one week.

A 2 mm high-tech pad makes UBERWOOD a silent floor.

UBERWOOD, the most durable and sustainable rigid core floor ever.

DESIGN INSPIRED BY NATURE

UBERWOOD convinces not only with the highest functionality, but also with its natural beauty.

Our designers have been inspired by all imaginable wood types and colors, grains and structures, assortments and finishes, for a real natural feel.

Because the feel of a floor is increasingly important today, we paid special attention to the surface structures during the development of UBERWOOD.

This is how three new synchronous structures were created - from authentic over iconic to rustic.

COLLECTION
OVERVIEW

EXCELLENT SURFACE SEALING

Surfaces must be designed to withstand all conceivable everyday situations. The protective sealant from UBERWOOD makes the floor particularly resistant. It not only protects against water spills, but also against scratches and damage.

2 mm UNDERLAY

To ensure first-class sound quality in the room, UBERWOOD is equipped with a 2 mm pad for sound absorption. This eliminates the need for an additional underlay.

UBERWOOD CORE BOARD WITH MEGALOC

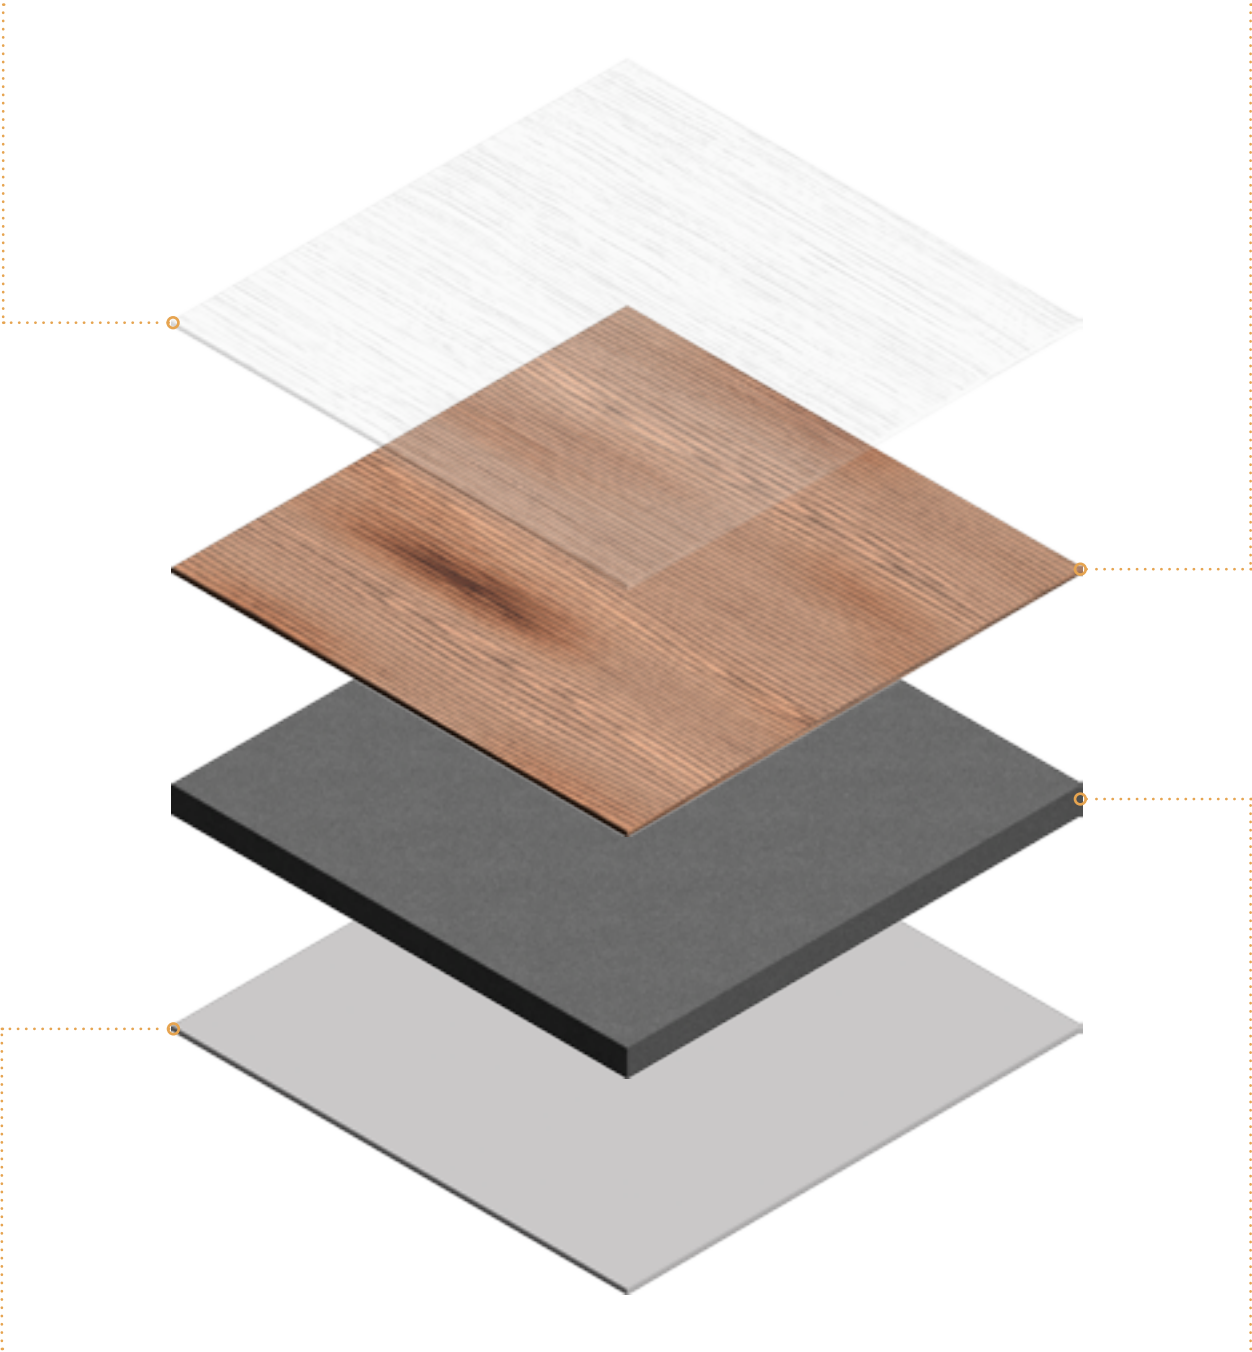

The UBERWOOD collection opens up a completely new era for core boards. The core board, which was specially developed for the demands of UBERWOOD, only unfolds its complete functionality in combination with the best of all installation systems.

Our patented megaloc aqua protect installation system guarantees water resistance for up to one week. As the most sophisticated product, this innovation sets new standards for the market.

Our quality standards go even further: all our floors are free of harmful substances and thus ensure a healthy and excellent indoor climate. Numerous independent certifications confirm this.

COLLECTION
OVERVIEW

ONE WEEK WATER RESISTANT

The combination of the UBERWOOD core board and the megaloc aqua protect installation system is the perfect choice - whatever the application.

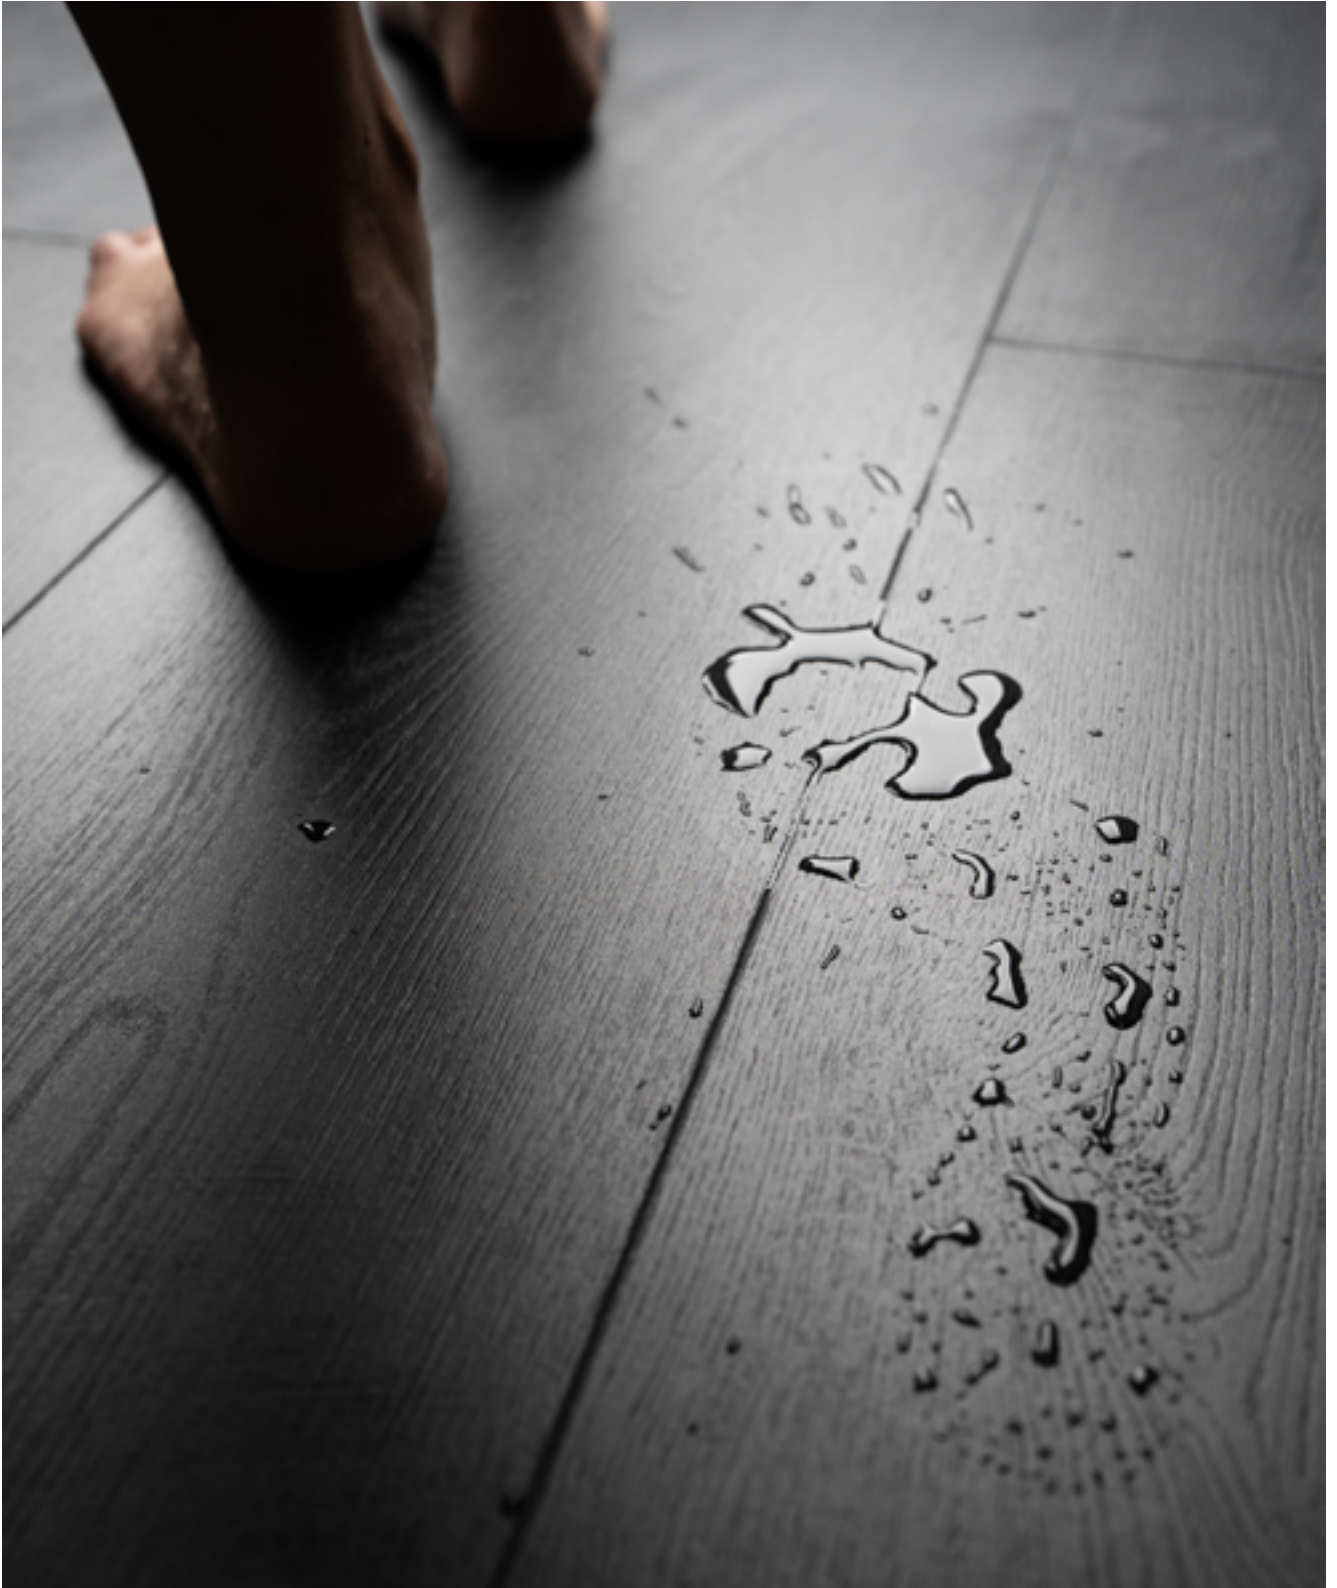

The floor is designed with double water protection. This means it can withstand water exposure for up to a week.

Thanks to our revolutionary technology, the floor is thus suitable for a wide range of uses: living room, kitchen, bathroom or commercial areas - UBERWOOD is always the right choice.

THE PATENTED MEGALOC SYSTEM

Megaloc AquaProtect is an easy-to-install, unique installation system. It prevents water from penetrating the joints and reduces swelling of the profile edges in favor of the durability.

The profile geometry as well as the extremely high manufacturing precision in combination with a special edge hydrophobisation even prevent standing water from above from negatively affecting the quality of the floor.

COLLECTION
OVERVIEW

WOOD FROM CERTIFIED FORESTS

The basis of our new generation of flooring is high-quality wood from sustainable forestry.

When sourcing materials, we rely on the immediate environment of our production in Germany and do not use tropical woods at all.

A self-commitment declaration and numerous certifications confirm this claim.

COLLECTION
OVERVIEW

UBERWOOD STANDARD PLANK SIZE

The UBERWOOD standard format is just the right size for expansive, light-flooded rooms. The format underlines the generosity of the room and ensures a harmonious room atmosphere.

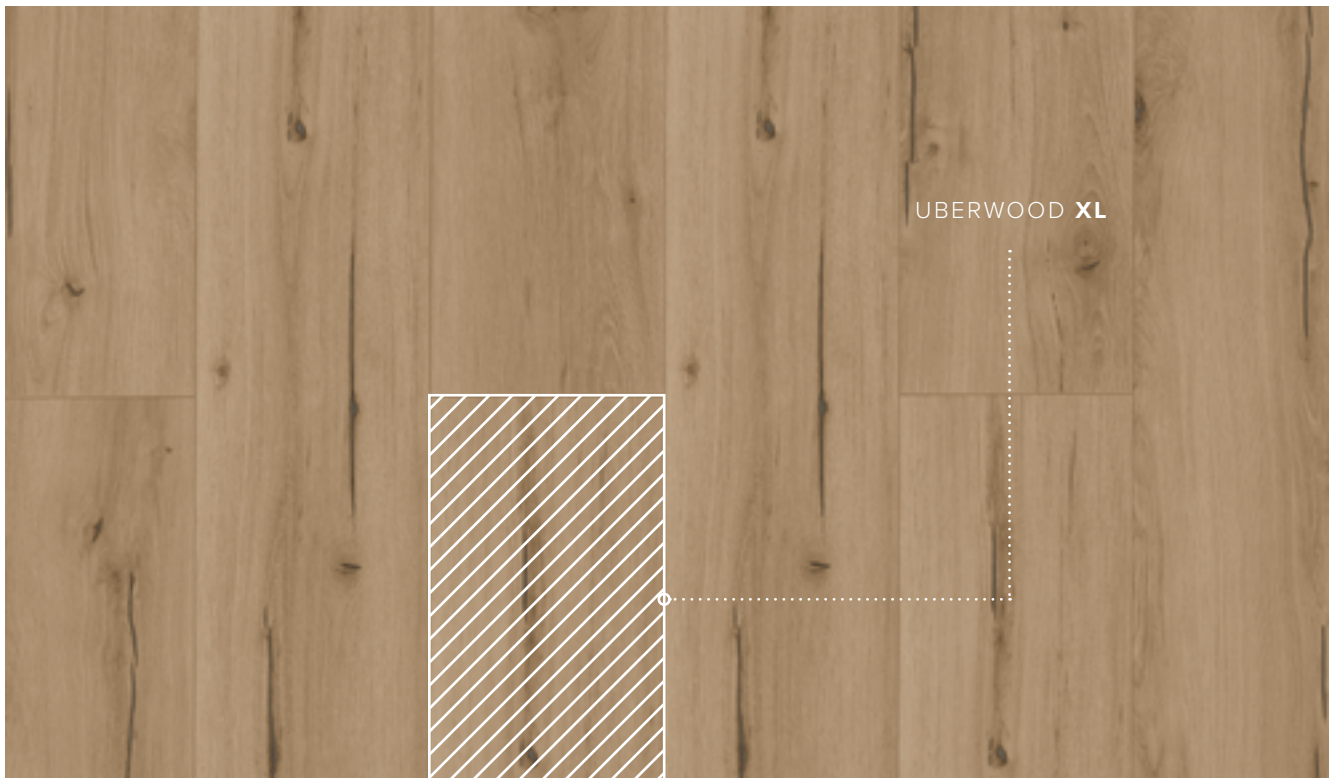

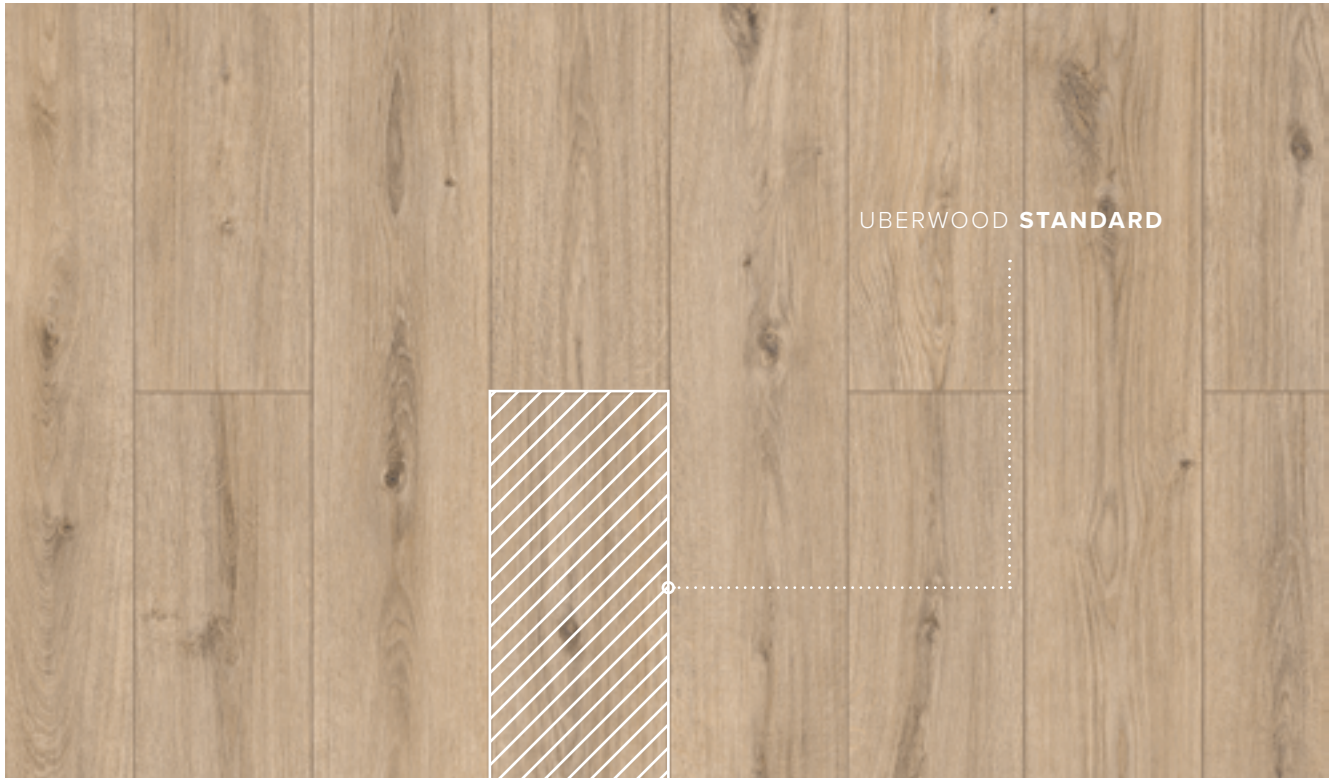

1286 × 192 × 7 + 2 mm

UBERWOOD XL PLANK SIZE

The XL format is wider and is therefore primarily suitable for smaller rooms. The wider planks visually enlarge the room and give the floor plan a more open feeling.

1286 × 241 × 7 + 2 mm

COLLECTION
OVERVIEW

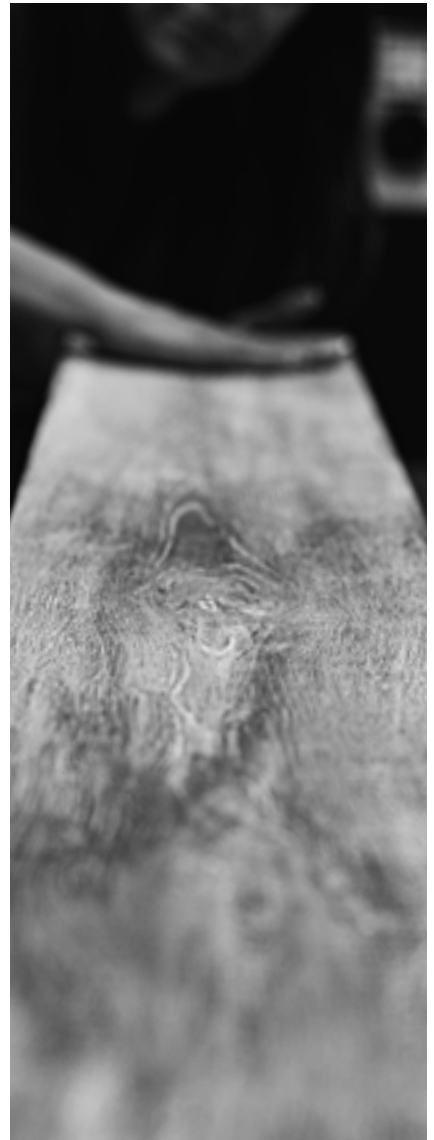

DESIGN

Our designs, which are matched to the feel, are modern, set sustainable trends and thus ensure timeless elegance. Like oak itself, the design of our oak decors also convinces with longevity.

The most important inspiration for our in-house designers are the regional forests. From there they source hand-picked woods, which are then prepared with great dedication in our own atelier.

Just like in a manufactory, our designers experiment with different finishing techniques. The woods are sanded, lacquered or even flamed. In this way, each decor tells its own story.

COLLECTION
OVERVIEW

SYNCHRONOUS STRUCTURES FOR AN ORIGINAL FEEL

Whether simple and elegant, authentic and natural or rustic - UBERWOOD caters to every individual taste.

We present three new synchronous structures that convince with their uniqueness.

AUTHENTIC

Slightly structured

In this range, we offer five XL-designs that are complemented by a simple, elegant synchronous structure.

The natural, uniform dullness convinces with a calming and unagitated structure.

ICONIC

Remarkably structured

Natural rusticity is in vogue. That's why six designs feature our iconic structure. A harmonious interplay between small and larger knots, which together with the pores are highlighted by a very natural depth.

Overall, the structure has a natural dullness, whereby the depths are additionally visually emphasised by a slightly higher gloss level.

RUSTIC

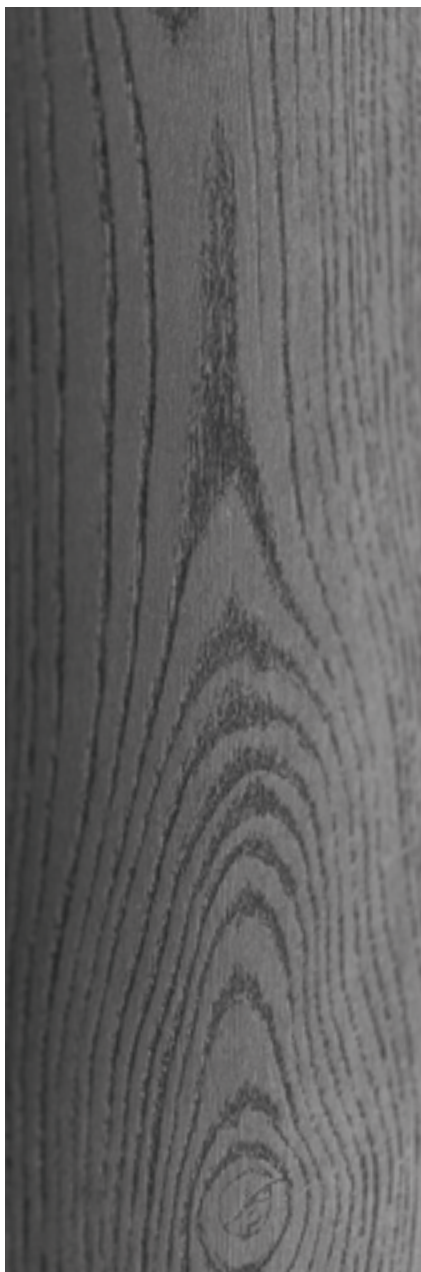

Significantly structured

Fans of rustic wood will be thrilled by the four designs. The striking cracks and knots achieve a depth that sets a completely new standard on the market. Authentic highlights are accompanied in the depths by an additional elegant polish that emphasises the naturalness.
